of conversations Turkle wants us to have were not necessarily more empathetic. So is face-to-face, eye-to-eye conversation itself inherently good, or is there more to it than that? That said, her final "guideposts" (pp. 319–33) are helpful for thinking through how we might overcome some of the negative impacts of digital communication and work toward a world in which creativity and human connection can flourish.

If one is looking for a book explaining what a conversation is and how to have a good one, Turkle's book probably will not be of much benefit, but for someone looking for language to describe the relational difficulties that have arisen since the advent of the smartphone, *Reclaiming Conversation* offers a rich exploration that is, interestingly enough, rooted in great conversations between the author and others.

Pursuing the Truth despite the Cost

David Fasold was a merchant marine officer on a commercial transport boat and so knew a lot about boats. He heard about the possible Noah's ark at Dogubayazit, Turkey, from Ron Wyatt, and when he came with Ron to see it in 1985, he was sure that it was a wreck of a boat. In 1988, his book, *The Ark*

of Noah, which describes the reasons for his belief that the boat-shaped formation was Noah's ark, was published. However, he had no training in geology. After several years of hearing from Ron Wyatt and others that the ribs, deck, and walls of the boat remains were composed of petrified wood, he began to have some doubts.

Fasold hired a TV crew from Germany to come with him to the ark site to photograph the petrified wood of the boat ribs, himself paying for the crew's airline tickets and expenses. While they were there, he discovered that Ron had carved the eroded and weathered fractures in the structure so that the spaces between the fractures made the rock layers between the fractures stand out like ribs. Unfortunately, he could not see any petrified wood in them. So, Fasold had to tell the TV crew that he was sorry he had wasted their time, and he sent them home.

Because of his rising doubts, Fasold collected twelve samples from various places at the structure that were being described as petrified wood, along with an "iron bracket," a part of an "anchor stone," and a "reed stone." With some risk, he smuggled the samples out of Turkey through customs. Somehow he got hold of me and asked me to voice my opinion. I had not been to the site, but I did a thin section study for him on all the samples he had collected. I then invited him to California State University Northridge and showed him what thin sections of fossilized wood looked like compared with thin sections of basalt and andesite. I also went to his house in San Diego and gave him a slide show on volcanic rocks so that he could understand what processes

occur in the formation of volcanoes. When all of this was done, he had no doubt in his mind that the formation was not Noah's ark.

David told me that his book, *The Ark of Noah*, was selling so fast that it was number 15 in world sales and that his book publisher was translating his book into five different foreign languages. But realizing now that the structure was not Noah's ark, he cancelled all further publication of the book, likely costing him hundreds of thousands of dollars in royalties. David just wanted the truth.

He agreed to co-author an article with me for my website titled

David Fasold in front of what at the time he thought were the remains of the ark (photo provided by David Fasold).

Letter

"Bogus 'Noah's Ark' from Turkey Exposed as a Common Geologic Structure," which stated that the formation was not the remains of the ark. The article was later published in the *Journal of Geological Education* 44 (1996): 439–44.

Wikipedia, when recently checked, claims that Fasold later changed his mind and again believed that the site in eastern Turkey was Noah's ark. This is not true. David had invested his savings and sold his house in order to study the site for many years. Having canceled his book, he died in 1998 essentially penniless, unable to even pay for his hospital care. So, I honor David as someone who demonstrated integrity to the end of his life, always willing to accept the truth, no matter how much it cost him.
