## Manuscript Guidelines

**JOURNAL VISION:** The pages of *Perspectives on Science and Christian Faith (PSCF)* feature original contributions that advance human understanding of science and Christian faith. Consistent with the expectations for an academic journal, the articles it publishes should be clear, relevant, have an evident central thesis, engage the pertinent scholarly literature with fairness and rigor, exhibit charity, and conform to the highest standards of scientific and Christian theological integrity.

**ARTICLES** advance a position on a particular subject related to science and Christian faith. Such papers should be at least 2,000 words but not more than 8,000 words in length, excluding endnotes. An abstract of 50–150 words and a list of 5–15 keywords are required and should be in both the text of the email submission and at the beginning of the attached essay.

**INSIGHTS** inform readers of important emerging developments in science, theology, and other disciplines in a way that demonstrates both their intrinsic importance and their relevance for the science-faith conversation. Such papers should not primarily discuss their authors' own work and should normally be between 1,000 and 3,000 words in length, excluding endnotes. They are written by leading experts at the invitation of the editor-in-chief acting on the advice of the editorial board or in response to an author proposal. Prospective authors should consult the *PSCF* webpage for details as to what such a proposal entails.

**REVIEWS** contextualize, summarize, and evaluate important science and religion conversations while informing readers of the key concepts and issues involved and identifying promising avenues for further work. Reviews should be authoritative, comprehensive, and critical. They are written by leading experts at the invitation of the editor-in-chief acting on the advice of the editorial board or in response to an author proposal. Prospective authors should consult the *PSCF* webpage for details as to what such a proposal entails.

Although **THEME ISSUES** are normally co-edited by leading scholars at the invitation of the editor-in-chief acting on the advice of the editorial board, prospective authors of **REVIEWS** and **INSIGHTS** articles are also invited to consider whether such articles might serve as the basis for a future theme issue.

**BOOK REVIEWS** describe, contextualize, and evaluate books of significance to scholarly science-faith discourse. Book reviews are written under the guidance of subject area editors, who select books for review and offer them to scholars with appropriate expertise. Individuals who would like to be considered as potential reviewers are welcome to express interest to book review editor **Janet Warren** ([ejanetwarren@gmail.com](mailto:ejanetwarren@gmail.com)) for inclusion in the reviewer database. Publishers may also contact the book review editor if they are not sure which subject area reviewer would best consider a particular book.
